BECOME

Boosting Circular Economy Expertise through Learning Communities

December 2025

Vol.4

BECOME project

BECOME focuses on accelerating the transition to a circular economy by strengthening the connection between education and the labour market. Its aim is to equip current and future students and professionals with the skills to develop innovative solutions and business models that support a circular economy.

Turku Meeting

We look back on a successful two-day meeting in Turku, Finland. Project partners from Finland, the Netherlands, Bulgaria, and Slovenia—representing both educational institutions and industry—came together to collaborate and exchange valuable insights on circular economy education.

During the meeting, participants shared experiences from their countries and organizations, offering diverse perspectives on the project's progress and future development. A key achievement was the joint development and refinement of the training programme for professionals, ensuring it meets the needs of all partners involved.

The atmosphere was both inspiring and productive, strengthening connections within the international consortium and reinforcing our shared commitment to the goals of the BECOME project. We look forward to continuing this fruitful collaboration in the next phases of the project.
